Course Objectives

On behalf of CCT2022 Peripheral, I would like to extend my brief greeting to all of you.

With the prolonged COVID-19 pandemic, not only the social structure but also the way in holding academic societies has been changing significantly. In the midst of all this, we are finally able to hold our meeting in a hybrid format this year. CCT2022 Peripheral will be held at the Kobe International Exhibition Hall from Thursday, October 27 to Saturday, October 29, 2022. Compared to recent conferences that had to be canceled or were held entirely on the web due to the COVID-19 pandemic, I am very pleased to be able to exchange information and interact directly with a variety of people.

This year, we will again prepare three channels and the main channel will focus on Live Case Transmissions. The number of Live Case Transmissions has been increased since last year, with live broadcasts from Tokeidai Memorial Hospital on the first day, Kyoto Katsura Hospital on the second day and Kasukabe Chuo General Hospital on the last day. The main focus of Live Case Transmissions will be on endovascular treatment from the lesions of aorto-iliac artery to below-knee artery. Among these lesions, the treatment for the femoropopliteal artery lesion, in particular, is in a state of true chaos, as various final devices have emerged and the approaches have been differentiated in various ways. We hope that through the Live Case Transmissions, you can sort out these points and establish a treatment method that is right for you.

The subchannel will live stream pre-recorded treatment videos of rare diseases that are not easily prepared for live broadcasts, as well as pre-recorded videos across the boundaries of surgery and radiology. We would also like to provide many opportunities for lectures and case reports.

I look forward to meeting you all in person in Kobe after a long while.

CCT2022 Representative Peripheral Course Director
Hiroshi Ando

Dates

Thursday, October 27 to Saturday, October 29, 2022

Venue

2F, Kobe International Exhibition Hall 1

Room 8 / Room 9 / Room 10

※CCT2022 will be a hybrid event of on-site and virtual meeting.

Language

English / Japanese

Simultaneous interpretation is available:

English and Japanese: Room 8

※Except for sponsored sessions.

Case Presentation

11:50-12:40 Case Presentation 4

Chairs

Makoto Sugihara, Kenji Suzuki

Commentators

Masatsugu Nakano, Yoshiaki Shintani

Tough Case of Iliac-CTO

Takuma Tsuda (Nagoya Ekisaikai Hospital, Japan)

A Case of Successful Revascularization of The Chronic Total Occlusion from The Posterior Tibial Artery to The Plantar Artery with TOPAZ Technique
Kohei Yamaguchi

(Saiseikai Yokohama City Eastern Hospital, Japan)

Successful stent-less catheter intervention for extensive DVT continuous to the IVC in a young patient with May-Thurner syndrome who was taking oral contraceptives

Shinya Ichihara (Asahi General Hospital, Japan)

A successful case of catheter-directed thrombolysis in a patient with deep vein thrombosis due to idiopathic eosinophilia

Takehiko Kido

(Showa University Northern Yokohama Hospital, Japan)

SMA stenting to HD patient underwent bowel resection for mesenteric ischemia after CABG

Hiroshi Araki

(Yokosuka General Hospital UWAMACHI, Japan)

16:05-18:00 **Nightmare in the cathlab**

Chairs

Nobuhiro Suematsu, Yoshito Yamamoto

Commentators

*Kiyohito Arai, Atsuki Fukae, Kenji Ogata,
Norihiro Shinozaki*

Vascular closure device failure: uncontrolled bleeding after withdrawal of a large-bore arterial sheath used in percutaneous Fogarty thrombectomy for acute lower limb ischemia

Yoshiaki Tsuyuki

(Shimada General Medical Center / Okanishi Clinic, Japan)

A case of critical limb ischemia with difficulty in treatment due to arteriovenous fistula developed during endovascular treatment

Yoshinori Yoshida (Higashiyamato Hospital, Japan)

A novel technique to use needles to overlap an elongated Supera stent to prevent it from protruding out of the body

Masanaga Tsujimoto

(Sapporo Cardio Vascular Center, Japan)

Major limb amputation caused by stent graft thrombosis in the femoral artery: case report

Hitoshi Anzai

(SUBARU Health Insurance Ota Memorial Hospital, Japan)

Implantation VBX in common femoral artery

Tomofumi Tsukizawa

(Kishiwada Tokushukai Hospital, Japan)

Impossible VBX mount balloon deflation

Junji Matsuda (Shuuwa General Hospital, Japan)

A case of aneurysmal changes at popliteal artery after three times endovascular therapy with paclitaxel devices

Emi Tajima (Tokyo General Hospital, Japan)

Percutaneous intraluminal needle cracking (PINC) successfully removed a fractured tip of Crosser catheter in a severely calcified tibial lesion

Kouta Yamada (Takatsu General Hospital, Japan)

Complication never comes alone

Yusuke Sato (University of Fukui Hospital, Japan)

Saturday, October 29
